

Raise your hand if you've ever had a gynecological exam...

One more good reason why seven middle-aged white guys shouldn't be writing laws to restrict our reproductive freedom.

Reelecting Bush means they get to write more laws restricting your right to choose.

It's not hard to see the irony in this group deciding the future of women's reproductive rights.

Four more years of George W. Bush and his cronies will mean one thing: more of the same. More anti-choice judges. More invasions of our medical privacy. More intrusions on our private lives and decisions.

And in a second term, Bush may have the chance to nominate as many as four Supreme Court Justices. You can bet that those Justices will look and think a lot like the men in this photo.

**Right now, these guys call the shots.**

Bush signing the first federal ban on abortion as the bill's co-sponsors look on.

**VOTE for John Kerry**  
on Tuesday, **November 2nd** and change that.
